WHY THIS COURSE

Obesity is the disease under the diseases you already treat.

Diabetes, hypertension, fatty liver, sleep apnoea and PCOS mostly share one root cause: excess visceral fat. Treat the weight and you help all of them at once. Yet Asian-Indian patients develop these problems at a lower BMI, and most of us were never formally taught to diagnose, stage and treat obesity itself. The GLP-1 and dual GIP/GLP-1 era has changed what is possible faster than any textbook we trained on. This course closes that gap in one focused year.

THE CLINICAL SYSTEM YOU WILL RUN

The CASPIAN framework

- C Classify** – stage the disease, not just the BMI.
- A Assess** – waist, risk and root causes.
- S Screen** – complications and comorbidities.
- P Personalise** – match the plan to the patient.
- I Intervene** – diet, drugs, devices, surgery.
- A Anchor** – hold the loss against relapse.
- N Nurture** – long-term, stigma-free care.

NOT ANOTHER WESTERN COURSE

What makes it different

India-first

Built on Asian-Indian cut-offs, an Indian-brand formulary and diets patients will actually sustain.

Current evidence

Semaglutide, tirzepatide and the 2025 landscape, taught with real Indian brands and prices.

Clinic-ready

Algorithms, dosing quick-references and patient handouts, not exam trivia.

Measurable

Live pre/post quizzes each session and a blueprinted final exam make the learning gain visible.

CURRICULUM

Twelve modules, from the science to the practice.

One 3-hour in-person session a month, each mapped to the CASPIAN framework and the course textbook.

01 The New Science of Obesity

03 The Obesity Consultation

05 Medical Nutrition Therapy

07 Behavioural & Psychological Care

09 Pharmacotherapy II – choosing & combining

11 Special Populations

02 Diagnosis, Classification & Staging

04 Secondary Causes & Complications

06 Physical Activity, Exercise & Sleep

08 Pharmacotherapy I – GLP-1 era foundations

10 Metabolic & Bariatric Surgery

12 Building an Obesity Practice

HOW IT WORKS

From sign-up to certificate, in four steps.

1

Reserve

Pay the ₹2,999 founding fee to reserve your seat.

2

Attend

12 monthly in-person sessions in Hyderabad.

3

Assess

Live quizzes + a 60-question final exam.

4

Certify

Pass at 60% and earn your certificate.

WHAT YOU GET

More than a course, a toolkit you keep.

The course textbook

Obesity Medicine for Indian Practice, 12 modules and clinical appendices.

Slide decks & case sets

Every session's material, to revise and teach your team.

Assessment & certificate

Live quizzes, a 60-MCQ final exam and your certificate.

Dosing & formulary tools

An anti-obesity drug quick-reference and Indian-brand formulary.

COURSE DIRECTOR

Led by a practising Bariatric Physician and teacher.

Dr Khizer Hussain Junaidy, MD

Diabetologist and Bariatric Physician based in Hyderabad. MD in Pharmacology, a Fellowship in Diabetes, and SCOPE Certification from the World Obesity Federation. He has delivered more than 200 invited talks, CMEs and workshops, serves as an investigator on national and international studies in diabetes and obesity, and authored a practical diabetes guide for Indian patients. The CASPIAN framework grew out of his daily obesity practice.

Certification & independence. On passing the final exam you receive the CASPIAN Certificate in Obesity Medicine from Caspian Healthcare Foundation, Hyderabad. Accreditation by a national professional body is under process, and CME credit points will be applied for from the Telangana State Medical Council once granted. This is an independent educational certificate, not a university degree, diploma or fellowship. The course is funded entirely by participants' tuition, with no pharmaceutical or commercial sponsorship of content, faculty or assessment. A money-back guarantee applies: a full refund before Session 1, and within 7 days of Session 1 if it is not value for money. Sessions are not recorded; a module you miss is sat with the next batch.
